

HANSiNWAY

WHERE INNOVATION MEETS THE ROAD

HANSiNWAY

BRAND INTRODUCTION

HANSINWAY is a next-generation tire brand engineered for Europe and beyond, crafted for performance enthusiasts, eco-conscious drivers, and 4x4 adventurers.

Leveraging cutting-edge material science, we deliver unmatched grip, durability, and sustainable high performance—empowering every journey without compromise.

REVOLUTIONARY POINTS

HYPERGRIP™ COMPOUND: A well-dispersed silica is combined with polymer sloution of SBR and BR.

SMARTTREAD® DESIGN: AI-optimized pattern reduces road noise by 5%.

ADAPTIVE+™ SIDEWALL: Variable stiffness for comfort & precision.

PERFORMANCE

ECO07 is an Eco-Friendly tyre for passenger cars. It features excellent comfort and quietness, as well as long life and good breaking performance. It contributes to fuel saving and the environment while securing safety.

MORE COMFORT: Blade-style cutting design reduces tread rigidity and enhances ride comfort.

QUIETER PERFORMANCE: Multi-pitch pattern design with irregular arrangement improves noise reduction.

WET ROAD SAFETY: Four longitudinal main grooves combined with fine groove patterns significantly enhance wet braking performance.

PERFORM01 UHP

PERFORMANCE

PERFORM01 is designed for Luxury sedan and SUV. Perfect performance and handling control for speed enthusiasts with special profile. Balanced wet and dry technology, delivering an extraordinary and comfortable luxurious driving experience.

SUPERIOR HANDLING PERFORMANCE: The optimized shoulder contour is perfectly matched with the asymmetric tread pattern design, delivering enhanced extreme handling capabilities.

ENHANCED WET SAFETY: Featuring wide longitudinal grooves paired with a 3D groove design, the tire efficiently cuts through water films on the road surface for safer driving in wet conditions.

COMFORTABLE RIDE: The semi-enclosed shoulder design effectively blocks "pumping airflow" formed by air movement, ensuring a quieter driving experience.

RANGE: **16-22**

FOCUSMAX05 VAN

FOCUSMAX05 is a new-concept, safe, and durable high-quality light truck and van tire that enhances mileage and comfort, meeting the low-noise requirements of high-end light buses.

The central two continuous parallelograms echo the design, enhancing the high-speed stability and handling of light truck tires.

The three straight grooves and closed shoulder design improve tire strength while significantly reducing tire noise, meeting the low-noise requirements of high-end light buses.

The continuous tread block design on the tire shoulder provides superior driving stability and control performance under high-load conditions.

The "lightning-shaped" decorative design on the tire sidewall ensures an elegant and distinctive appearance.

FOCUS H/T

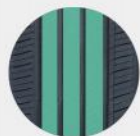

PERFORMANCE

FOCUS H/T is a high-performance tire designed for SUVs, delivering exceptional handling stability and ride comfort, providing a premium and reassuring driving experience for a wider range of SUV models.

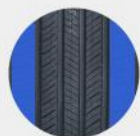

The design of fine sipes and enclosed shoulder blocks significantly reduces tire noise, providing excellent ride comfort.

The multi-pitch micro-grooves and multi-sipes collaborate in an asymmetric design, delivering superior wet traction while maintaining handling stability.

The coarse knurling at the groove base enhances the tire's aesthetic appeal from the exterior while reducing pattern noise, further improving quiet performance.

The optimized combination of a silent contour and structural design minimizes tire vibration noise and enhances the overall performance of SUVs.

TERRA A/T

TERRA A/T is designed as a versatile all-terrain tire for both off-road and paved surfaces, featuring optimized interlocking large tread blocks and multi-angle sipes to effortlessly handle various road conditions, whether paved or unpaved.

The interlocked large tread blocks combined with multi-angled sipes are designed to ensure both off-road traction and powerful performance on unpaved surfaces, while effectively reducing noise on paved roads.

The hybrid groove pattern and straight shoulder grooves provide guaranteed traction on mountainous paths, muddy terrain, and snowy roads.

The reinforced semi-closed shoulder lateral grooves effectively lower tread noise while increasing the strength of the tread blocks.

TERRA M/T

TERRA M/T is developed for rugged terrains, rocky gravel, and other harsh road conditions, featuring exceptional off-road traversal and cross-country performance.

The optimal combination of large tread blocks and grooves delivers outstanding off-road driving and handling performance.

The design of fine grooves and blade slots enhances wet-surface driving and braking performance.

The reinforced three-link rib design at the groove base increases tread block strength, improves mud and stone expulsion, and enhances the tire's three-dimensional aesthetic appeal.

The integrated "armor" reinforcement design for the tire shoulder and sidewall enhances impact resistance, ensuring reliable performance under harsh road conditions while significantly improving durability.

ALL SEASON

IMPETUS A/S
IMPETUS+A/S

IMPETUS A/S

With adaptive all-season compound, IMPETUS A/S tyres provide impressive grip on snowy and wet winter roads. It is a premium all-season tire with outstanding comprehensive performance in comfort, handling, and high-speed driving in all weather conditions.

EXCELLENT DRAINAGE PERFORMANCE: Through-type drainage trench design ensures ultimate drainage performance, enhancing driving safety on wet and slippery road surfaces.

3D STEEL SHEET DESIGN: The interlocking steel blade design within the tread pattern enhances the overall rigidity of the tread blocks, improving handling performance on complex road surfaces.

SUPERIOR HANDLING: Directional tread pattern design delivers exceptional handling performance.

OPTIMIZED COMPOUND FORMULA: The new-generation tread compound design offers better low-temperature flexibility, enhancing tread grip in cold conditions.

IMPETUS+A/S

IMPETUS+A/S is developed for light and medium-duty vans, trucks and pickups, as well as crossover and sporty utility vehicles. With optimized wet braking and aquaplaning performance, IMPETUS+A/S improves handling from dry to snowy roads.

SUPERIOR WEAR RESISTANCE: The optimized shoulder profile is perfectly matched with the classic three longitudinal groove pattern design, enhancing the product's wear resistance.

ENHANCED WET SAFETY: The open shoulder design facilitates rapid water drainage, improving the product's wet grip performance.

EFFECTIVE PREVENTION OF IRREGULAR WEAR: The ingenious combination of shoulder reinforcement ribs and 3D steel strips enhances shoulder strength while effectively preventing irregular wear.

WINTER

SNOW08

SNOW09

SNOW08

SNOW08 is designed as a premium tread pattern specifically designed to enhance the handling of high-end sedans and SUVs in winter conditions, ensuring effortless driving even in harsh weather.

The extra-wide tread design with fine lamellar patterns significantly increases the contact area between the tire and the ground, effectively enhancing driving control and stability while improving braking performance on icy surfaces.

The reduction of asymmetric pattern grooves on the outer side maintains rigidity and provides a larger contact patch, enhancing grip during sharp turns on both wet and icy roads.

Multiple directional grooves intersecting with three wide straight grooves efficiently absorb water to prevent hydroplaning, while effectively trapping snow to form snow columns, thereby improving snow and water evacuation performance.

The tread utilizes a soft rubber compound with a glass transition temperature of -40°C, ensuring the tire retains its flexibility in cold weather, significantly improving traction on snow and ice while maintaining superior handling performance.

SNOW09

SNOW09 is a lightweight load-bearing tire with high stability and reliability under winter conditions, ensuring safety on snow and ice-covered roads.

The reinforced rib design at the shoulder transverse groove enhances the stability of light truck tires during high-load, high-speed driving on icy and snowy surfaces, improving handling and cornering performance.

The tread features a 3D ultra-thin groove design combining curved and straight shapes, paired with an optimized angle to enhance grip on icy and snowy surfaces while ensuring superior control and driving performance.

The interlocking center tread block design improves high-speed stability and quick braking on icy and snowy roads.

The low-temperature-resistant soft rubber compound in the tread maintains flexibility in cold weather, effectively enhancing traction on icy and snowy surfaces and ensuring excellent handling performance.
